ASC FOLLOW ME 240

OUTDOOR LINE

The urban litter vacuum of the future.

We have always wondered how we can make the cleaning of public spaces more efficient and user friendly. The use of equipment to do these tasks should increase productivity while reducing strain on the operator.

This is why we developed Follow Me, the innovative autonomous driving system for the ASC 240 product. When turned on, Follow Me system is able to identify and track the operator, allowing the machine to follow him/her in total safety and even in crowded areas. When equipped with the Follow Me system, the ASC 240 electric vacuum cleaner evolves into the ASC Follow Me 240, the first and only self-driving street vacuum cleaner in the world.

Our vision of the future.

We have developed the cutting-edge Follow Me technology that is unique in the world of professional cleaning machines. By standing in front of the sensors and with the click of a single button, the ASC Follow Me 240 will recognize you as the operator and begin to follow. The full set of sensors on the machine allows it to detect and avoid fixed and mobile obstacles, guaranteeing the safety of the machine and those around it.

A perfect combination of cleaning and sanitization.

The 30 litre on-board liquid tank is capable of holding any type of cleaning or sanitizing product. This tank feeds a double nozzle spray system: the first nozzle is at the tip of the suction pipe, and the second is located inside the collection bin. The suction pipe nozzle allows you to put out lit cigarette butts or sanitize a surface after vacuuming animal waste, while the second nozzle helps to avoid combustion inside the bin, reduces dust and deodorizes.

More clean air for you too.

The vertical filter retains PM10 fine particles and releases purified air into the atmosphere. Its vertical position allows for the use of the entire surface area, a big improvement over horizontal filters that are required to be rotated when clogged. With ASC Follow Me 240 you reduce maintenance inefficiencies and take advantage of long work sessions at maximum performance.

Zero effort, zero worries.

ASC Follow Me 240 guarantees high operator comfort and ease of operation, freeing you from manually positioning the machine. As the operator you will only have to focus your attention on finding areas to clean and only use your arms to direct the suction hose.

* MAIN OPTIONS

INTUITIVE CONSOLE

With integrated hour meter, simple to use without any training.

ERGONOMIC JOYSTICK

Fingertip access to Turbo fan, horn and liquid spray controls.

CONTROLLED STEERING

The manual control can be folded out of the way when Follow Me is in use.

SAFETY DEVICES

Fire extinguisher, horn, reverse buzzer, reflectors, parking brake, automatic stop when hopper opened.

Benefits

Eliminates the effort to support the suction hose.

Eliminates blockages in the hose.

Eliminates contact with dust.

Eliminates the need for filter maintenance.

ULTRA LIGHT HOSE

Made of carbon fibre without weighing you down.

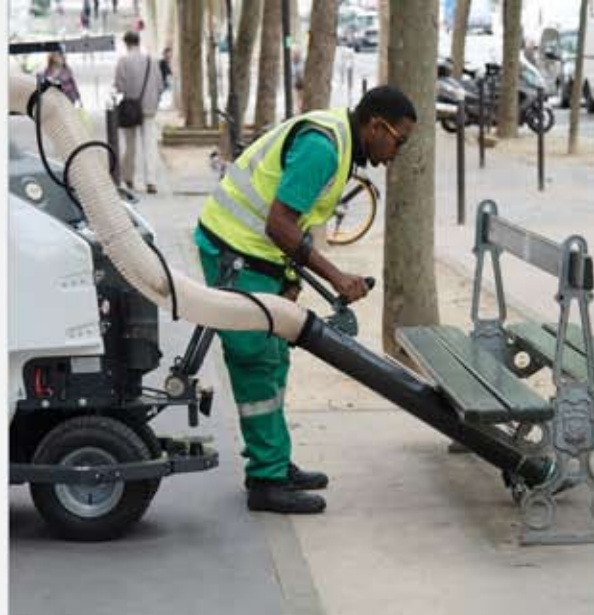

TOOL KIT

Lockable glove compartment for phone & wallet. With broom, litter picker and bucket for large size waste items.

SPRAY SYSTEM

Is activated by the joystick and is used to put out lit cigarette butts and sanitize.

HOW IT WORKS

The AIR BLAST system works continuously until it is turned off. An air jet with a pressure of 8 bar is released inside the filter every 20 minutes, which removes any dirt deposited on its surface and then collected inside the bin itself.

SAFETY DEVICES

LIQUID TANK

BAG HOLDER

FOUR WHEELS

TECHNICAL SPECIFICATIONS	ASC FOLLOW ME 240
SPECIAL SET-UP	-
VACUUM POWER	1500 W
FILTER CLEANING	Manual
HOSE SUPPORT	Mechanical
WORKING TIME	> 10
SUPPLY	Battery
TRACTION	Electric
TOTAL POWER	2700 W
ON BOARD BATTERY CHARGER	40 A
MAX BATTERY CAPACITY (AGM)	320 (274)
MAXIMUM GRADIENT	20%
MAXIMUM SPEED	6 km/h
STEERING RANGE	2600 mm
VACUUM HOSE LENGTH	4100 mm
VACUUM HOSE Ø	120 mm
WATER TANK CAPACITY	-
HOPPER CAPACITY	240 L
NEBULIZERS	2 n°
TWIN FRONT WHEELS	Yes
FILTERING SURFACE	21 m ²
FILTER TYPE	Polyester cartridge
NOISE LEVEL	68 dB(A)
MACHINE DIMENSIONS (L X W X H)	1835x975x1825 mm
WEIGHT WITHOUT BATTERIES	375 KG

APPLICATIONS

URBAN AND METROPOLITAN

GARDENS AND PARKS

PARKING LOTS

TOURIST SITES
